PROFILE

B.Com graduate with hands-on experience developing Python applications, REST APIs, and responsive web interfaces. Skilled in Python, JavaScript, Django, Flask, REST APIs, HTML, CSS, Bootstrap, and database technologies. Built practical projects including a voice-controlled personal assistant, book management REST API, GST billing system, API-integrated weather application, and responsive educational platform. Seeking an entry-level opportunity in software, web, Python, backend, or full-stack development.

TECHNICAL SKILLS

Languages	Python · JavaScript
Frontend	HTML · CSS · Bootstrap · DOM
Backend & APIs	Django · Flask · REST APIs · Fetch API · JSON
Databases	MySQL · SQLite · MongoDB
Tools	Git · GitHub · VS Code · Postman
Core Concepts	Object-Oriented Programming · API Integration

FEATURED PROJECTS

JARVIS — Personal Voice Assistant | *Python · Speech Recognition · Text-to-Speech · JSON*

Link: github.com/Raj0854/Python/blob/main/jarvis.py

- Developed a Python-based voice assistant for processing spoken commands.
- Implemented speech recognition and text-to-speech interaction.
- Built command-processing logic for executing user instructions.
- Implemented JSON-based memory for storing and retrieving information.
- Developed wake-word activation and assistant control functionality.

BOOK LIBRARY REST API | *Python · Flask · REST API · JSON*

Link: github.com/Raj0854/book-management-system

- Developed a RESTful API for managing digital book records.
- Implemented GET, POST, PUT, PATCH, and DELETE endpoints.
- Added request validation for required fields, prices, and unexpected input.
- Implemented JSON-based data persistence for book records.
- Used appropriate HTTP status codes for API operations.

BILLING SYSTEM WITH GST | *Python · Billing Logic · GST*

Link: github.com/Raj0854/Python/tree/main/PROJECTS

- Developed a Python-based billing application with invoice generation.
- Implemented GST calculation for billing transactions.
- Added discount functionality for flexible invoice calculations.
- Applied programming logic to automate billing operations.

THE LEARNING HUB | *HTML · CSS · JavaScript · Bootstrap*

Link: raj0854.github.io/The-Learning-Hub/

- Designed and developed the complete frontend for a learning/institute platform.

- Created responsive layouts using HTML, CSS, JavaScript, and Bootstrap.
- Implemented interactive frontend functionality using JavaScript and DOM manipulation.
- Focused on a structured and user-friendly interface.

WEATHER APPLICATION | *HTML · CSS · JavaScript · API*

Link: raj0854.github.io/weather-website/

- Developed a web application for retrieving and displaying weather information.
- Integrated an external weather API using JavaScript.
- Processed API responses and dynamically displayed weather data.
- Built the interface using HTML, CSS, and JavaScript.

VIDSPLAY – Video streaming Platform | *HTML · CSS · Bootstrap · JavaScript*

Link: raj0854.github.io/VIDSPLAY/

- Designed and developed a YouTube-inspired video streaming platform with a responsive user interface.
- Created categorized sections for recommended, trending, movies, TV shows, gaming, and dance content.
- Integrated YouTube videos for interactive video playback.
- Built responsive layouts, navigation, and interactive components using HTML, CSS, Bootstrap, and JavaScript.

EDUCATION

BACHELOR OF COMMERCE (B.COM) | University of Mumbai

2022 – 2025 | CGPA: 7.66 / 10

CERTIFICATIONS

Full Stack Python Developer

Advanced Excel

MS-CIT
